If we plot the points on an xy graph using a spreadsheet as seen above, the data does not appear to be linear. The data points do not form a discernable pattern. The data appears to be scattered randomly about the graph. Although a spreadsheet is able to give us a best fit line (a linear regression or least squares line), that equation will not be useful for predicting body fat index based on ...

Using the concepts from Ex. 1.5, find (a) the maximum flow deceleration along AB; and (b) its location. Solution: We see that u slows down monotonically from  $U_\infty$  at A to zero at point B,  $x = -R$ , which is a flow "stagnation point." From Example 1.5, the acceleration  $(du/dt)$  is  $\approx R^2 \delta \epsilon \approx 2R^2 \delta \dot{u} U^2 \approx 2 du \delta u \delta u^2 \delta x = +u \dots$
