the writing was quirky, but i could deal with that, but something wasn't gripping me. so, a couple of years later i thought i would give it another try. i finished it in about a month. i agree that the book is well written, and there are some interesting passages, but the story is about as interesting in the end as chewed gum. i got the feeling that the author left a lot of characters out in the open. she either didn't know what to do with their stories, or, perhaps, she herself was tired of them and could not be bothered to give them closure.

the aunt, to me the most interesting character, is dealt with in a very odd way. she is an important character for about half the book, then she is shipped out of the plot, only to make a sort of cameo appearance towards the end. quayle, who's only interesting feature appears to be the size of his manhood, is as interesting to read about in the beginning, as he is in the end. his journey could have been summarised in a very short short story. as for his quasi-psychic daughter... again, a potential story line which just fades, as do most of the characters in the end.

you reach the end of the book thinking, really? that was your story? it was like watching a colourful stage set where the actors have few lines, and the decoration is more important than the plot. still, the language and her writing style are very interesting. (less) flag

how many people wanted to go to this island in the atlantic after reading this subtly entertaining book? i'm one. i could really feel the weather, the slow pace of life, and the color of the people. great work annie.

and results in real depth underneath these humble characters and locals.

the story follows quoyale, a hulk of a man, who's life begins with dysfunction and tragedy. he is a man adrift in upstate new york, deadened from abuse and ill treatment. the only positive thing he receives from his early life and broken marriage to an unfaithful and dreadful wife, is two daughters, an aunt, angis hamm, convinces quoyale to return to his ancestral home in newfoundland where he finds work on the local newspaper. this is where the story really finds solid ground with proulx deftly describing the local culture, language, and harsh climate of newfoundland.

if there is a weakness in this book, it's that the striking language, and intriguing side observations tended to distract me from the story line. there were moments where i became lost in the story and needing to backtrack or accept that i was lost for a bit, until i found enough clues to navigate back to familiar waters. while several key characters were fully formed, many of the secondary characters were one dimensional and never took shape in my mind. however, the strength of the prose and the rich setting were enough to keep me engaged throughout the entire story. there was just enough struggle and heartbreak to drive the story and we see real change in quoyale.

i finished "the shipping news" feeling that proulx is a better writer than character builder and story teller. but i still believe she's a talent and this is an important work. there is such great connection between her language skills and the setting and people of this book. the desolate location, angry ocean, and gritty town feel like the best, most recognizable character in the book, if that makes sense. worthy of its acclaim and awards, i give it four and a half stars, rounded to five. an artistic tale of small triumphs and personal growth perched in the richly layered backdrop of a seaside northern town. ...more flag 176 likes · like · see review view all 23 comments Feb 26, 2019 jaline rated it it was amazing · review of another edition shelves: 2019-completed, x-favourites during the years that i was the manager of a business, i had the wonderful good fortune to have on staff many people originally from newfoundland. one aspect that i found fascinating is the similarities between that relatively small 'rock' and my holiday in southwest england many years ago. in england, i noticed that accents and the way certain things were said changed about every five miles. the same is true with newfoundland. definitions and phrases are different depending on where people live during the years that i was the manager of a business, i had the wonderful good fortune to have on staff many people originally from newfoundland. one aspect that i found fascinating is the similarities between that relatively small 'rock' and my holiday in southwest england many years ago. in england, i noticed that accents and the way certain things were said changed about every five miles. the same is true with newfoundland. definitions and phrases are different depending on where people lived. the most interesting part is that even though they would use different terms for the same things, they could still understand each other! well, it's all english after all.

this story follows a family from new york to newfoundland where quoyale's family is from originally. his aunt travels with the family and is looking forward to a new start with quoyale and his two daughters in the place she had left behind nearly 50 years before.

the writing is very different and interesting. while they are in their small town in new york, the sentences are terse, choppy – very few articles and no conjunctions. tight, compressed sentences that reflected their tight, compressed existence.

when they arrive at their destination, everything changes – the sentences gradually grow and expand. there are poetic turns of phrase mingled with the mangled english of the newfoundlanders. quoyale, a would-be journalist starts to turn out interesting articles for the newspaper whose owner still goes out fishing whenever he can.

i was enthralled with the people i met while reading and when this family saga ended - of loves lost and found; of careers begun, stalled, and begun again; of friendships and warmth and caring; of dark times and sad times and cruel times and joyful times – when it all came to an end, i felt i would give anything for a few more (like 10 or 20) chapters, even though the ending is perfect.

this novel won several prizes, including both the national book award and the pulitzer prize. it is always a pleasure to me when a book i enjoy so much is given accolades and recognition, and this one is a perfect example.

*"here is an account of a few years in the life of quoyale, born in brooklyn and raised in a shuffle of dreary upstate towns."*

i'm all for the everyman or everywoman story. these are the kind of characters who appear to live rather ordinary lives; nothing flashy about these people. kent haruf and elizabeth strout write some of the best, in my opinion. john williams's *stoner* comes to mind immediately as well. there's a quality to their writing that makes me feel as if there is indeed something remarkable about these quiet folks after all. their humanity shines through. i just didn't feel it here, and i'm having difficulty pointing out why. perhaps it's all due to the writing style? much of this novel is written in fragmented, choppy sentences - the sort your former high school english teacher would have gleefully yanked up with the dreaded red pen in hand. not that i mind this unconventional approach as a rule. i felt it lacked a kind of warmth here that would have been the perfect counterbalance to the stormy, frigid atmosphere of the newfoundland setting.

*"at last the end of the world, a wild place that seemed poised on the lip of the abyss. no human sign, nothing, no ship, no plane, no animal, no bird, no bobbing trap marker nor buoy, as though he stood alone on the planet. the immensity of sky roared at him and instinctively he raised his hands to keep it off. translucent thirty-foot combers the color of bottles crashed onto stone, a bit of bubbled into a churning lake of milk shot with cream."*

the setting is what truly stole the show for me entirely – that and the description of the old homestead, going back generations through the quoyales, a family with a rather colorful, infamous history. newfoundland is on my long list of places to visit someday. proulx's powerful descriptions went a long way in putting some stunning images in my mind's eye. i wish that more of the plot had transpired at the old house. it was two little girls and an aunt after misadventure and catastrophe struck. there was a delicious sense of foreboding whenever the house was described – i love it when a place becomes nearly like a living and breathing entity. my wish was not to be fully granted, however. a bit of a disappointment, i admit. i would have happily spent many more days beneath that nightmarish roof. i wanted more of this:

*"the house was heavy around him, the pressure of the past filling the rooms like odorless gas. the sea breathed in the distance... but the house was wrong... dragged by human labor across miles of ice, the outcasts straining against the ropes and shouting curses at the godly mob. winched onto the rock. groaning, a bound prisoner straining to get free. the humming of the taut cables. that vibration passed into the house, made it seem alive... he was inside a tethered animal, dumb but feeling. swallowed by the shouting past."*

there's a motley crew of characters besides the quoyale family. they were well described, but i can't say i ever latched onto a single one of them. there are some unhappy and tragic pasts that are revealed. i swear i'm not completely heartless, but these failed to move me! i was fully inspired by at least three more novels before this one. let's just say that anais barbeau-lavalette, jeanette winterson and annie ernaux are at least partly to blame for my lackluster response to *the shipping news*. my apologies to annie proulx who through no fault of her own failed to seduce me as these three women friends did. i know i'm in the unpopular minority with my three star rating, but i've always said i believe in second chances. i have a collection of her short stories waiting for another day.

*"all the structure wires of life were stripped out and he could see the complex of life. nothing but rock and sea, the tiny figures of humans and animals against them for a brief time."*

no, this one is not without its problems--this is not graham greene, it is not toni morrison, it is not geoffrey eugenides, after all. alas, it suffers from similar ailments shared by other pulitzer winners: it is, at times, a tad too superficial ("a visit from the goon squad"); somewhat dull-ish, small, insignificantish ("breathing lessons"); dense ("american pastoral") or even a little too long, overdone (sorry--"loneseone dove"). & it is thoroughly enjoyable, too. (which is never a detractor from the overall experience.)

p.s. several surprises await (in the last 12 pages) those readers who manage to reach the end. so... get there, people. ...more flag 134 likes · like · see review view all 9 comments nov 08, 2007 jocelyn rated it did not like it my initial review of this book was simply "bullllshiiiiit", but, um, perhaps more explanation is deserved. after a handful of people whose taste i respect raved about this book, i was looking forward to it, and got to page 180 or so before finally admitting "this feels like a chore" and giving it away (and i \*rarely\* leave books unfinished).

what got...to me about this book was mainly proulx's style was too...forced. nothing that occurred felt real or believed by the author herself (and it's not that i demand "realism"; one hundred years of solitude is one of my favorites). it's that i felt like i could see the mechanisms behind all of her "tricks"...the anecdotes that characters told felt like ideas proulx kept on a notepad before compiling them together for this novel. it read like the final project from a brilliant student finishing a course on creative writing.

i'm not saying proulx isn't a good "writer"...but i don't see her as a storyteller. ...more flag 118 likes · like · see review view all 42 comments dec 08, 2019 michael finocchio rated it it was amazing · review of another edition shelves: novels, american-20th-c, john\_dos\_passos\_prize, national-book-award, fiction, pulitzer-winning-fiction, pulitzer-fiction the shipping news is a wonderful read. we are introduced to quoyale and follow him from his life and failed marriage in mockingburg (!), new york through to his move and settling into newfoundland with his two daughters, bunny and sunshine. there is a nearly dostoyevski-level of tragedy underpinning the story - sexual assault, perversion, violence - which litters the road quoyale travels down.

there are a few innovative aspects to the text itself, the names and the grammar. annie proulx comes up with some of the most original names i have ever seen (tert card! bunny! partridge!) and this helps make the text more memorable and fun. the staccato sentence structure where she often drops the subject is a clever way of dropping us into a pseudo-interior dialog inside quoyale's head. these two features give a unique dynamic to proulx's writing.

at the beginning of the story, quoyale reminded me of ignatius j. reilly from a confederacy of dunces, both physically and in terms of his lack of career, but fortunately for quoyale, he quickly latches onto a friend, partridge, and a career in journalism despite a rocky start. **"quoyale didn't recognize news, had no aptitude for detail, he was afraid of all but twelve or fifteen verbs. had a fatal flair for the false passive."** (p. 8).

like ignatius or even augie march (the adventures of augie march to a degree, quoyale is desperately trying to move beyond his limitations: **"in a profession that tutored its practitioners in the baseness of human nature, that revealed the corroded nature of civilization, quoyale constructed a personal illusion of orderly progress. in atmospheres of disintegration and smoking jealousy he imagined rational compromise.**" (p. 10). fortunately for him, he is able to surmount the early catastrophe with petal and reconnect with his somewhat damaged, but still maleable kids and becomes a charming father figure. (yes, i am skipping some detail here in an effort to avoid spoilers.)

in his migration to the cold, windy north, he brings his aunt (herself full of incredible surprises) who imparts wisdom in little chunks: **"as you get older you find out the place where you started out pulls at you stronger and stronger...probably some atavistic drive to finish up where you started."** (p. 30). she is going back, with great courage, to a place where she personally suffered but where she will build herself up again despite her own setbacks.

i wanted to mention that another characteristic of this book that makes it exceptional is the care the author takes to give a credible and poignant backstory to nearly all of the characters. none are mere cardboard cutouts of people. even the crazy cousin has a moment of lucidity at the end. i found this to really bring me and bind me to the story.

there is a lot of comedy in the novel - on arriving in barlick-claw, newfoundland, the scene in the tickle (!) motel, bar & restaurant was particularly hilarious off of route 999 (about as far from anywhere as you can imagine!): **"quoyale was the first to take a shower. discoloured water spouted from a broken tile, seeped under the door and into the carpet. the sprinkler system dribbled as long as the cold faucet was open. his clothes slipped off the toilet and lay in the flood, for the door hooks were torn away. a bible on a chain near the toilet, loose pages ready to fall. it was not until the next evening that he discovered that he had gone about all day with a page from leviticus stuck to his back."** (p. 55)

quoyale goes to work for the local paper, the *gammy bird* and his male colleagues are all adorably bizarre. nutbeam, tert, and billy plus his boss jack - all described with care and humor. the book gets its title from quoyale's column, the shipping news, where he is to gather information on comings and goings from the port and which overtime he truly excels at while he gets used to the natural beauty (and unnatural human debris) of the area. cleaning up around his house: **"when he came upon a torn plastic bag he filled it with debris. tin cans, baby-food jars, a supermarket meat tray, torn paper cajoling the jobless reader...plastic line, the unpurled carboal tube from a roll of toilet paper. pink tampon inserts. behind him a profound sigh, the sigh of someone beyond hope or exasperation. quoyale turned. a hundred feet away, a glistening back. the minke whale rose, glided under the milky surface. he stared at the water. again it appeared, sighed, slipped under. roiling fog arms flew fifty feet above the sea."** (p. 110). her descriptions of nature are occasionally breathtaking like this one.

in an important passage, quoyale's colleague billy gives him a metaphor for the schema for a man's life: **"ar, that? let's see. used to say there were four women in every man's heart. the maid in the meadow, the demon lover, the stouthearted woman, the tall and quiet woman."** (p. 182). while i have a hard time relating that to my own experience, it definitely correlates directly to quoyale. the tall and quiet woman is clearly the wonderful wavy (!) and the story of she and quoyale is another wonderful highlight to this charming book.

each chapter begins with a quote, most often from a book of knots - the rope and knots being metaphors that are used throughout the novel. i really liked the last sentence of the story as well which uses this wonderful metaphor: **"water may be older than light, diamonds crack in hot gear's blood, mountaintops give off cold fire, forests appear in mid-ocean, it may happen that a crab is caught with the shadow of a hand on its back, that the wind might be imprisoned in a bit of knotted string, and it may be that love sometimes occurs without pain or misery."** (p. 355).

overall, this book was absolutely deserving of its pulitzer prize and made me want to read more work by this gifted author who, incidentally, was not published until she was in her 50s giving the present reviewer hope as yet! and i know i have to still see the movie with kevin spacey. ...more flag 114 likes · like · see review view all 21 comments may 24, 2008 annet rated it it was amazing shelves: favorites, have-to-read-again, literature-pure, beautiful-poetic, wilderness-books-can-usa, wow-impressive, classics so far this is a great read, this book is a little gem. had to get used to the language and the different way of storytelling, but this story, i love it so far!

and the names--nearly every one of them strange, and (to me) irksome. i couldn't decide through the entire book how to pronounce Quoyile--with a hard c or with a w. wavy reminded me of wavy gravel. petal. Marty for a girl. keety. last names (often used alone) were bizarre as well. Nutbeam. pretty. Quoyile (double whammy, first and last). Buggit.

a coil of rope

a Flemish flake is a spiral coil of one layer only. it is made on deck, so that it may be walked on, if necessary.

the Ashley Book of Knots

much like that coil of rope, our protagonist, Quoyile, has also been stepped on all his life. *a great damp loaf of a body. at six he weighed eighty pounds. at sixteen he was buried under a casement of flesh. head shaped like a crenshaw, no neck, reddish hair rucked back. features as bunched as kissed fingertips. eyes the color of plastic. the monstrous chin, a freakish shelf, jutting from the lower face.* he stumbles into the newspaper business through a friend he meets one night in a laundromat in Mockingburg, New York. he is not very good at it. he also meets Petal Bear, a small woman he yearns for, they share a month of happiness, followed by six years of misery, two children and a multitude of scars, seared into his flesh from her indiscreet, two timing ways. Petal Bear does not value Quoyile or his children. alone, without work, without a wife, on the heels of his father's death, he decides to gather his children and follow his Aunt Agnis to his ancestral home on Newfoundland's stark and majestic coast.

it is there, working for the Gammy Bird, a small newspaper, covering the shipping news, that Quoyile battles his inner demons and struggles to build a new life for himself and his daughters. but Quoyile is a man defeated, a man with no love of self. he even considers himself as a headline for one of his stories. **stupid man does wrong thing once more.** i wanted so badly for Quoyile to find some gumption, to love himself just a little. when an oil tanker docks a killick-claw, Quoyile writes an article about it. before release, the entire tone of his article is rewritten by the managing editor, only this time Quoyile is incensed. "*this is a column*", *belowed Quoyile.* "*you can't change somebody's column, for Christ's sake, because you don't like it!*" *jack asked me to write a column about boats and shipping. that means my opinion and description as i see it. this* -- he shook the paper against the slab cheeks -- *isn't what i wrote, isn't my opinion, isn't what i see.*" at last! i was so overcome with sheer joy that i leapt out of my deckchair, threw my arms in the air and let loose a resounding "yes"! (okay so my neighbours may think i am a little hinky)

this is a great story, with a cast of truly colourful characters but if you will bear with me for just a moment, i would like to talk about what this book, wrong or right, said to me.

you cannot leave your past behind, no matter where you travel, there too, it is.

everyone is worthy, not all heroes are tall, dark, handsome, beautiful, sexy, confident or comfortable in their own skin.

you cannot run, but you can dig deep and you can find a new hope, a new joy in life.

family is defined not only by blood but also by bond, by those who are there, in the dark and the light.

these homes of love we build, house many rooms, sanded and painted in the shades and colours of our life, furnished with those moments that, however inconsequential they may seem to others, have in fact, defined us.

cover beauty is coveted and exploited; provides keys to all the right doors, but it is our inner selves, our own moral code that is the true compass to the coveted life of beauty, peace, happiness and love.

i am not going to lie. i love the fact that this story unfolds on the stark and beautiful, majestic coast of Newfoundland, a province in the land i call my own.

very rarely do i change a rating on a book once i have set it, but in this case, how can i not. trust me, this story is worthy of every one of those five stars.

finally i would like to thank Steve who wrote an incredible, heartfelt review of this work that put it on my radar. ...more flag 85 likes · like · see review view all 42 comments aug 07, 2013 Cecily rated it really liked it · review of another edition shelves: miscellaneous-fiction, language-related, usa-and-canada, landscape-location-protagonist this is my first Proulx, so i didn't know if the unusual writing style is typical, or specially chosen for this particular story. i hope it&apos;s the latter, as it works very well.

update: i&apos;ve now read the collection, **close range: brokeback mountain and other stories**, which i reviewed here. those stories use similar language, but somewhat toned down.

it covers a couple of years (plus some backstory) in the life of thirty-something Quoyile: a big, lonely, awkward and unattractive man, always having or doing the wrong thing. he is a not very successful journalist in New York, who ends up moving, with his young daughters (bunny and sunshine) and aunt, to a small, somewhat inbred, community in Newfoundland where the aunt and his late father grew up. somehow Proulx keeps the reader on the fence: he isn't especially lovable, and yet he elicits more sympathy than mockery in this reader.

i think one weakness is that the mother of the girls is too horrible, and the manner of her departure from their lives stretched my credulity somewhat.

language

the narrative style is the first thing to hit. it is very distinctive, continues throughout the book, and could be infuriating, though i didn't find it so. it is telegraphic and observational, reflecting Quoyile's job. there are staccato sentence fragments, some overworked analogies, some of which are wonderfully vivid, and a few of which are laughably awful. grammar sticklers may struggle to enjoy this book, but it's their loss - context is all, and in this context, i think it works.

if i were as clever and witty as some of my gr friends (you know who you are), i would have written this review in the style of the book.

anyway, some typical examples:

this is the entire opening paragraph of a chapter: "the aunt in her woolen coat when Quoyile came into the motel room. tin profile with a glass eye. a bundle on the floor under the window. wrapped in a bed sheet, tied with net twine."

another whole paragraph: "near the window a man listened to a radio. his buttery hair swept behind ears. eyes pinched close, a mustache, a packet of imported dates on his desk. he stood up to shake Quoyile's hand. gangled. plaid bow tie and ratty pullover. the British accent strained through his splayed nose."

analogies: \* "eyes the color of plastic"  
\* "the sullen bay rubbed with thumbs of fog"  
\* "on the horizon icebergs like white prisons. the immense blue fabric of the sea, rumped and ceased."  
\* "parenthesis around her mouth set like clamps. impossible to know if she was listening to Nutbeam or flying over the Himalayas"  
\* "in a way he could not explain she seized his attention; because she seemed sprung from wet stones, the stench of fish and tide."  
\* "eyes like a thorn bush, stabbing everything at once"  
\* "the ghost of his wife, "petal's essence riding under his skin like an injected vaccine against the plague of love."  
\* "fingernails like the bowls of souvenir spoons." (that's the whole sentence.)

the town and community

aspects of the town and its characters remind me of David Lynch's 1980s TV series "Twin Peaks": strange characters, often with impairments of mind, body or emotions, slightly strange names, odd superstitions, and dark secrets (murder, incest, rape, insurance fraud).

the town of Killick Claw isn't prosperous, and the environment is still harsh, but it's better than when the Aunt grew up there: "the forces of fate weakened by unemployment insurance, a flaring hope in offshore oil money."

*the Gammy Bird* is the local paper, and it's like no other: lots of adverts (many of them fake), deliberate typos and malapropisms, libelous gossip (including a regular catalogue of sex abuse cases), shipping news and "we run a front-page photo of a car wreck every week, whether we have a wreck or not". poor Quoyile is bemused and has the uneasy and familiar feeling "of standing on a playground watching others play games whose rules he didn't know".

themes

knots are the most obvious one. each chapter opens with a quotation pertinent to what it contains, and many are from Ashley Book of Knots, which Proulx found second-hand, and gave her the inspiration and structure she sought. knots feature in the plot metaphorically (in terms of being bound or afraid), in a more literal and superstitious sense. rope can be wound and knotted to make good a wound or separation. we also learn that Quoyile's name means "coil of rope", and i suppose he is pretty tightly coiled for the first half of the book.

shipping is obvious, too, not just from the title, but because Quoyile ends up writing the eponymous shipping news in the local paper, in a community where everyone needs a boat. most of the introductory quotes that are not from Ashley Book of Knots are from a mariner's dictionary. i am confused there were times when the quantity and level of detail slightly exceeded my interest, but i'm glad i stuck with it.

the book is riddled with pain, rejection, estrangement and mentions of abusive relationships (never graphic); many are haunted by ghosts of past events and relationships gone wrong. but although it is sometimes bleak, it is rarely depressing, and sometimes it's funny. even close and fond relationships often have an element of awkwardness and distance; for instance, Quoyile always refers to "the aunt", rather than "my aunt". even after living with her for a while, "it came to him he knew nearly nothing of the aunt's life. and hadn't missed the knowledge."

ultimately, it's at least as much about (re)birth and healing as death and doom. one character slowly realises it may be possible to recover from a broken relationship: "was love then like a bag of assorted sweets passed around from which one might choose more than once?"

other miscellaneous quotations

\* "a failure of normal appearance" - if you can't even achieve that, what hope is there?  
\* "believed in silent suffering, didn't see that it goaded"  
\* "in a shop, "the man's fingers dropped cold dimes"  
\* "fog shuddered against their faces"  
\* "the house was garlanded with wind"  
\* "in such a harsh environment, "the wood, hardened by time and corroding weather, clenched the nails fast"  
\* "a few torn pieces of early morning cold the shape and color of salmon filets" (i think i'd prefer that one without the fish)  
\* "the woman in the perpetual freeze of sorrow, afloat on the rise and fall of tattered billows"  
\* "a babysitter "doing overtime in a trance of electronic color and simulated life, smoking cigarettes and not wondering, the floor around her strewn with hairless dolls."

down on his luck journalist Quoyile, with young daughters bunny and sunshine in tow, heads to Newfoundland to hopefully reignite his floundering life, leaving New York, and a dead wife behind he travels to stay with his aunt Agnis in a bleak down ancestral home right by the sea, it's remote, it's cold, it's cold. he would take a job writing of the shipping news across the water for a paper called...wait for it...the Gammy Bird. the other characters in the book also have odd names, there's wavy prowse, tert card, beaufield Nutbeam, diddy shovel and Alvin Yark, 10/10 for imagination. becoming acquainted with the locals, Quoyile suttlers along in life whilst trying to adapt to his surroundings, all the while weary of his daughters, and the affect it had on their own upbringing.

Proulx does do a wonderful job when describing Newfoundland, this was just about as good as it got for me, and after a promising opening setting the scene, i actually was looking forward in a positive light. however, the prose style is a big sticking point, and the pacing didn't suit me either, which, quite frankly was all over the place. to it's credit, it certainly wasn't dull, the characterisation was pretty good, but apart from Quoyile, Aunt, and daughters, i didn't like spending time with any others, had i lived in a trailer, wore a bidweiser cap, and went boating i may have done. someone mentioned to me they would rather read Newfoundland than go there. i disagree, would gladly get out my winter warmers and stand on the rocks staring into the fog, than read this again. as for a Pulitzer prize, the competition was either weak or non-existent.

this book is revolutionary in it&apos;s use of language. she punctuates inventively and her punctuation "style" gives her sentences a strange movement. the book moves, it actually moves, as you read it.

there are moments of such pain like when Quoyile lies still in his bed as Petal Bear fucks another man in their home--and it&apos;s not written in a way where you feel pity or anger; but you identify, i mean you get still like Quoyile--or i did... there is this triplet of sentences where Quoyile realizes bunny may fall from the ladder she is beginning to climb and when i read it, i felt my stomach drop and had a quick intake of breath--but those sentences were non dramatic, not written to scare or startle--it wasn't even the sentences that got me like that, it was like this weird pause orchestrated by creative punctuation.

the story involves a thirty-six year old oaf from the (fictional) town of mockingburg, new york named quoyle, who in the first of several reader-alienating devices, does not have a given name. an all-night clerk at a convenience store, he's befriended by a newspaperman named partridge, who recommends quoyle for the staff of a community newspaper as a reporter. a disappointment to his pull-yourself-up-by-the-bootstrap father and walked over by his abusive wife petal bear, quoyle's misfortunes continue when his terminally ill parents commit ritual suicide and petal is killed in a car accident, having sold their daughters bunny and sunshine to sex traffickers on her way out the door.

quoyle's only family (and the most realized character in the novel) is his paternal aunt agnis hamm, a yacht upholsterer who suggests her nephew and children need a fresh start. aunt agnis is nostalgic for the place she grew up and offers to relocate with them to quoyle's point in newfoundland, their ancestral home where a house has stood unoccupied in coastal wilderness for forty-four years. braving the wind and sleet and tire tracks standing in for a road, the quoyles find the house uninhabitable. they move to the nearest town of killick-claw, where partridge has recommended quoyle for a job on the community newspaper, the *gammy bird*.

*he had never seen so many ads. they went down both sides of the pages like descending stairs and the news was squeezed into the vase-shaped space between. crude ads with a few lines of type dead center. don't pay anything until january! no down payment! no interest! as though these exhortations were freshly coined phrases for vinyl siding, rubber stamps, life insurance, folk music festivals, bank services, rope ladders, cargo nets, marine hardware, ship's laundry services, davits, rock band entertainment at the snowball lounge, clocks, firewood, tax return services, floor jacks, cut flowers, truck mufflers, tombstones, boilers, brass tacks, curling irons, jogging pants, snowmobiles, party night at seal flipper lounge with arthur the accordion ace, used snowmobiles, fried chicken, a smelting derby, t-shirts, oil rig maintenance, gas barbecue grills, wieners, flights to goose bay, chinese restaurant specials, dry bulk transport services, a glass of wine with the pork chop special at the norse sunset lounge, retraining program for fishermen, vcr repairs, heavy equipment operating training, tires, rifles, love seats, frozen corn, jelly powder, dancing at uncle demmy's bar, kerosene lanterns, hull repairs, hatches, tea bags, beer, lumber planing, magnetic bobcooms, hearing aids.*

quoyle's boss is jack bugbit, a fisherman who launched a newspaper when the government proved inept at retraining him for anything else. quoyle, whose journalism experience is limited to covering municipal news, is put on the car wreck beat, taking pictures and writing copy for the latest fatality, or using stock photos from past accidents if there hasn't been a new one. the fact that quoyle's wife was just killed in a car accident seems not to have made an impression on bugbit, who also wants quoyle to cover the shipping news, checking in each week with the harbormaster diddy shovel on which ships are coming and going.

the *gammy bird* consists the managing editor tert card, an alcoholic who detests the weather and economic malaise of newfoundland and fakes almost all the ads in an effort to make the paper look profitable. billy gossip is jack's second cousin, a bachelor who writes a salacious penny column under the pseudonym junior sugg and offers to help quoyle learn how to navigate the waters. nutbeam is an english expat who covers the local sex abuse beat and reports foreign news he hears on the radio. living in the tickle motel, where an inoperable phone and a broken doorknob traps them inside the room their first morning there, quoyle gets a crash course in newfoundland living.

with land passage often more difficult than water, quoyle pays \$50 for a homemade speedboat, which becomes the laughingstock of killick-claw. pooling resources with aunt agnis, he begins repairing the house on quoyle point, but learns that winter will ultimately close the twenty-eight mile road to town and make travel impossible. the shipping news grows from a list to a column, which permits quoyle to express an opinion. agnis tries to match her nephew with one of her seamstresses, but he gravitates toward a young widow named wayve prose whose spouse, he learns, was also a philanderer. he tries to survive in a land determined to kill anyone who crosses it.

*these waters, thought quoyle, haunted by lost ships, fishermen, explorers gurgled down into sea holes as black as a dog's throat. bawling into salt broth. vikings down the cracking winds, steering through fog by the polarized light of sun-stones. the inuit in skin boats, breathing, breathing, rhythmic suck of frigid air, iced paddles dipping, spray freezing, sleek back rising, jostle, the boat torn, spiraling down. millennial bergs from the glaciers, morbid, silent except for waves breaking on their flanks, the deceiving sound of shoreline where there was no shore. foghorns, smothered gun reports along the coast. ice welding land to sea. frost smoke. clouds mottled by reflections of water holes in the plains of ice. the glare of ice erasing dimension, distance, subjecting senses to mirage and illusion. a rare place.*

the pleasures of *the shipping news* can be found in annie proulx's descriptions. she's peerless when it comes to describing atmosphere, weather or landscapes and transporting the reader to the environment, or the moment, of the scene she's describing. newfoundland comes to life as an alien world populated by frontiersmen victimized by drowning seas, car accidents or a downturn in the fishing industry. in a misstep, proulx also throws sexual abuse into the cauldron in a cavalier, almost jokey way, but the novel is at all times unique in its ability to carry the reader away to the far side of the world without judging it or making a mockery of the locals.

*tert card slammed through the door. "i'm shinnicked with cold," he shouted, blowing on his chapped hands, backing his great rear up to the gas heater, "this degree of cold so early in the season takes the heart out of you for the place. trying to drive along the cliffs this morning with the snow off the ice and the wipers froze up and the car slipping sideways i thought it's only november. how can this be?" started thinking about the traffic statistics. last january there was hundreds of motor vehicle accidents in newfoundland. death, personal injury, property damage. in just one month. that's how the need begins, on a cold day like this coming along the cliff. first it's just a little question to yourself. then you say something out loud. then you clip out the coupons in the travel magazines. the brochures come. you put them on the dashboard so you can look at a palm tree while you go over the edge. in february only one thing keeps you going--the air flight ticket to florida on your dresser. if you make it to march, boy, you'll make it to heaven. you get on that plan in miskey bay, there's so much ice on the wings and the wind from hell you doubt the plane can make it, but it does, and when it glides and lands, when they throws open the door, my son, i want to tell you the smell of hot summer and suntan oil and exhaust fumes make you cry with pleasure. a sweet place they got down there with the oranges." he sucked in a breath, exhaled a snotty gust of sleek yellow water like a liqueur. addressed quoyle. if *the shipping news* were narrative non-fiction or an article in the *new yorker*, it would be a five-star winner for me. almost every paragraph is beautifully written, but they didn't add up to compelling fiction. proulx's imagination falls short after the character of aunt agnis, who feels like she should be the protagonist. quoyle and waverly's relationship is given hardly any care or attention, while bunny and sunshine are also just there, adding nothing (the cute names of these characters adding to their artificiality). descriptions of newfoundland are the star attractions and i recommend the novel for those; story and characters small print on the back of the program. ...more flag 67 likes · like · see review view all 21 comments feb 16, 2022 baba rated it did not like it · review of another edition shelves: contemporary journalist, writer and wordsmith american annie proulx won the **pulitzer prize for fiction and the national book award for fiction in 1994** with this critically acclaimed literary circles second novel. it doesn't take a genius to spot my use of &aposs;literary circles&aposs; as probably not being a compliment about this story of an awkward (physically and visually) cuckolded outlier having no other real option than picking up sticks and moving (with his daughters and an aunt) to his ancestral home in a rem journalist, writer and wordsmith american annie proulx won the **pulitzer prize for fiction and the national book award for fiction in 1994** with this critically acclaimed literary circles second novel. it doesn't take a genius to spot my use of 'literary circles' as probably not being a compliment about this story of an awkward (physically and visually) cuckolded outlier having no other real option than picking up sticks and moving (with his daughters and an aunt) to his ancestral home in a remote part of newfoundland in canada, where he sort of, by accident or accident finds himself. a book lauded for its prose, its portrayal of a quirky cast, and details of life in the past and present in this remote port community, all tinged with an underlying delicately dark humour. at least on this occasion, even though this was just too random, too uninteresting and too artificially constructed for me, i can see what others see in it. just a 3 out of 12, one star read for me though.

where this book went so wrong for me was having such an intriguing and eye opening start with the cuckolding of the main protagonist and his sad docile responses to the situations his wife put him into... and to go from that riveting scenario to tales of the awkward dude finding himself in the cold canadian outback in a quirky community felt like a cold bucket of water over my reading head!

that is the plot as it stands so far. this book won awards. why is it that some committees feel that if it makes you miserable it must be good prose?

well, to be honest it is - good prose that is - the english is well constructed and the descriptive powers of the author are formidable. unfortunately this formidable prose is completely lacking in any mitigating humour that would save it from being heavy, dull and dreary to read.

it might be that some shade of humour and likability may edge it's way between the covers after the man starts the job after which the book is named. i am just not sure it is worth the knot as so far the only enjoyable part of the book has been the knot work quotes at the start of each chapter.

2. (november 7) there is room for all books in the world, it is good that we do not all read (or write, alike) this review is my opinion however and in my opinion overblown descriptiveness is a cheap and nasty way of convincing people that they are reading high quality literature when they are (usually) not. it is a specific style of writing that is only worthy of parodies such as cold comfort farm, which mocked the florid style very well indeed.

as an example of what i dislike about the over-florid style, the shipping news is made to measure. consider the following sentence; "... oilcloth the colour of insect wings" [pg 57]. do you feel that information as to the colour of the oilcloth has been imparted to you?

really? wings of which insect? fruit flies and mosquitoes? (transparent with lovely iridescence and dark veins), praying mantises? (usually, a delicate shade of green) cockroaches? (dark brown for the outer wing case and light brown for the inner wings in ninety percent of species). or maybe a butterfly which is also an insect, a fact that cannot have escaped an author as addicted as annie is to using every english word in the dictionary whether or not it is relevant to the meaning she is trying to impart.

newfoundland is a large island on the eastern coast of canada, known for its variable maritime weather which can surprise its

population on any given day, forcing much of it to grow hard and fight their way through pounding waves and breaking storms. newfoundland was england's first possession in north america - it became a colony in the early 17th century and remained first a colony and later a dominion of the united kingdom until 1949, on which year it entered the canadian confederation and became the nation's tenth province. two referendums had to be organized - the first was proven inconclusive, and the second was won by only a slight majority of pro-confederation voters (52.3% to 47.7%). since joining the confederation newfoundlanders continue to see themselves as a unique group, and have maintained their own culture, cuisine and even a variety of english language.

for generations, cod fishery defined newfoundland: it was a source of cultural and social identity, as most families were either directly involved in fishery or indirectly connected to it, by earning their livelihood as fish transporters or sellers, worked at fish plants and other fishing related businesses. for centuries newfoundland fishermen used technology which allowed them to target specific species and ages of fish, map the area of fishing and limit the size of their catch. after confederation newfoundland fishermen were introduced to modern technology, such as the sonar and radar, which allowed them to fish deeper than ever and pursue fish on an unprecedented scale and compete with other nations that also fished in the region. however, these advances did irreversible damage to the stock of northern cod: by fishing on larger areas and deeper scale the cod were depleted at the scale which did not allow the surviving fish to replenish the stock fished each year; trawlers also caught an enormous amount of other fish, which although not commercially viable was invaluable to the area's ecosystem and severely disturbed the predator-prey relations among the fish. a significant amount of capelin were caught, on which the cod preyed - further fueling the speed of extinction of the remaining cod stock. in the summer of 1992, the northern cod biomass - once the largest in the world - fell down to 1% of its previous level; in a dramatic attempt to save the cod the federal government declared a moratorium on cod fishery along the east coast, hoping that the cod population would recover and the fishing industry could be restored. it never did; the damage to newfoundland's ecosystem was irrevocable, and the cod has not returned to atlantic canada. cod fishery remains closed - it was the largest industrial closure in canadian history - and over 35,000 fishers and people involved in fishing related businesses found themselves suddenly unemployed. the population of the province decreased by about 60,000, as many families were forced to leave the rock which bore them and hope for a life elsewhere.

it is to this rock that quoye comes with his children and aunt, to the post-confederation but also post-cod newfoundland, where those who remain try to survive. there he meets jack bugbit, tert card, beaufield nutbeam and bayonet melville, and others cast away in the small newfoundland town of killick-claw, where quoye lands a job for the local paper, *the gammy bird*. quoye is to report car wrecks and the shipping news - arrivals and departures of ships into the harbor. clumsily at first but nonetheless carrying on, quoye begins to find his own voice as a reporter, make friends and acquaintances in the tightly-knit community and begins to find himself in the harshness of newfoundland's weather, and begins to discover the past of his ancestors, themselves castaways from newfoundland to new york.

i have never been to newfoundland, but i felt as if the book transported me there. although annie proulx is an american, she moved to newfoundland for research and spent time among newfoundlanders, and wrote a book with a great sense of place (and its weather), populated with interesting and memorable people with great, quirky names. although the story is a classic one - broken man leaves former life and begins anew - she sells it with her ability to transport the reader to the places she describes, and slowly draws him into her world. newfoundland comes alive in *the shipping news*, with its fog and wind and blocks of ice clinking in the bay, the boats cradled by the waters at one time and violently thrown aside the next; smoke rising from the chimneys, people reading *the gammy bird* and quoye's shipping news while sipping their warm drinks, each confronting their own problems, all united by the rock they live on, loving and hating its rough caress at the same time.

chapters are introduced with a description of a knot from *the ashley's book of knots*, serving as an illustration of the themes of the book - quoye is a coil of rope; "a flemish flake is a spiral coil of one layer only. it is made on deck, so that it may be walked on if necessary." quoye's first name is never given - he has been walked on all his life, and is like a coil of tangled rope. in mockinburg he had few friends, and nobody took time to get to know him; newfoundland is to literally be a place of his new self-discovery, but there everybody knows the quoyes; quoye effectively becomes nothing more than an extension of his long dead family. throughout the book, quoye has to untangle the knots made by others which tightened around him and made him a dangled mess and set free the person that he has inside of himself, and *the shipping news* is an admirable story of this one man's struggle to overcome personal defeat and his own shy pursuit of happiness on a harsh canadian island, where hope swirls in the air even amidst the winter storm. ...more flag 43 likes · like · see review view all 24 comments jul 01, 2007 eli rated it was amazing this is one of the very best novels i&apove had the chance to read. it&apos;s not just that the story is rich in and of itself - and it is - it&apos;s that the words themselves are so artfully assembled that they provide layers of undercurrents that add depth and emotion to the narrative. this book reads like a symphony, with many intertwined themes and narratives all woven together into a whole, unified picture.

quoye, the main character in this novel, is an outcast with what he calls generational ill luck. from childhood, he has been bullied and shut off by his family and those around him with the exception of his friend partridge. his wife petal hates him, abuses and misuses him while leaving all parental duties of their two daughters to him, he finds no fulfillment in his work and it is until tragedy strikes and an aunt arrives that quoye is able to disentangle himself from a rather sad life leaving for a small community in newfoundland.

it is in this small tightknit community that quoye finally, even though in his late thirties, blossoms. at first, quoye is filled with such low self-esteem and great self-loathing that he invites more contempt than pity, even to the reader. he slowly comes to a point of self-realisation, surrounded by a community that offers friendship and love.

proulx depicts this small community with such brilliance. its traditions, landscape, economic state, weather, kindheartedness, cruelties all done with incredible compactness.

quoye lives the life of a sad cliché. his family doesn't like him, his wife has affairs and he&apos;s socially awkward. his only thought is for his children, bunny and sunshine. when a situation causes them to move from mockinburg, new york to newfoundland, canada, home of quoye's ancestors, he finds himself in over his head. proulx is a master manipulator in this story as she forces the reader to sympathize with quoye's situation. he's dumped into a new setting, new country with only his children and aunt agnis to keep him company.

the descriptive detail in this book is fresh and full. "in the bay they saw a scallop dagger halfway to the narrows, a wake like the hem of a slip showing behind it." i feasted on this line because i loved it so much and you can look forward to this richness throughout the story.

proulx makes newfoundland come to life. this is likely due to the fact that she splits her time between there and wyoming. this may not be the kind of newfoundland you know though. it has this wild and dark, mythical side to it that you may have heard as a stereotype about the province. incidentally when this book came out, there was some controversy about proulx's portrayal of newfoundlanders. some people from the province thought readers would assume these stereotypes were true. i would say the novel does nothing to dispel the stereotypical view of 'the rock' and its inhabitants but you have to remember this is fiction. this is clearly stated on the back of the book.

watch for the chapter titles. each relates to a type of knot and informs the reader on the content of the section. chapter one is entitled "quoye", 'a flemish flake is a spiral coil of one layer only, it is made on deck, so that it may be walked on if necessary.' this gives you an idea of quoye's character even before you start reading.

something that deserves mention is the book won both the pulitzer prize and the national book award in 1994.

proulx's writing style is unlike anything i've read before. her syntax is fragmented and her removal of pronouns interrupts the fluidity of the story. for some this may be difficult to get around.

as well, a suspension of disbelief is required as various coincidences and other 'unbelievabilities' pop up throughout the book and would be difficult to take otherwise. this includes the strange characters with quirky names like billy pretty, tert card and beaufield nutbeam.

please note, this novel is not for everyone. the climax of the story occurs at the very beginning of the story and settles into a slow denouement. this is completely contrary to the normal story arc. this a quiet, steady book about family and the idea of home. it is still, i repeat, not a page turner. that being said, i enjoyed the stiffness and contemplative quality that rose out of the book. for those who like stories about how a person can change and the influence of the land on the mind, this book is for you. ...more flag 30 likes · like · see review view 1 comment « previous 1 2 3 4 5 6 7 8 9 ... next » new topic discuss this book topics posts views last activity **play book tag:** the shipping news, by annie proulx, 4.5 stars 5 22 dec 05, 2020 08:01am **reading 1001:** the shipping news 4 25 jul 26, 2020 02:51pm **reading the world:** botm july - the shipping news 8 12 jul 26, 2020 01:55pm **play book tag:** [poll ballot] the shipping news by annie proulx - 4 stars 12 19 jun 08, 2020 05:57pm more topics... share recommend it | stats | recent status updates readers also enjoyed

in the shipping news e. annie proulx departs from the darkly fated heroes of heart songs and postcards to explore the cracked-up contemporary american family, to quoyle, a third-rate newspaper hack, with a "head shaped like a crenshaw, no neck, reddish hair ... features as bunched as kissed fingertips," is wrenched violently out of his workaday life when his two-timing wife meets her just deserts. an aunt convinces quoyle and his two emotionally disturbed daughters to return with her to the starkly beautiful coastal landscape of their ancestral home in newfoundland. here, on desolate quoyles point, in a house empty except for a few mementoes of the family's unsavory past, the battered members of three generations try to cobble up new lives. newfoundland is a country of coast and cove where the mercury rarely rises above 70 degrees, the local culinary delicacy is cod cheeks, and it's easier to travel by boat and snowmobile than on anything with wheels. in this harsh place of cruel storms, a collapsing fishery, and chronic unemployment, the aunt sets up as a yacht upholsterer in nearby killick-claw, and quoyle finds a job reporting the shipping news for the local weekly, the gammy bird (a paper that specializes ... [more] in sexual-abuse stories and grisly photos of car accidents). as the long winter closes its jaws of ice, each of the quoyles confronts private demons, reels from catastrophe to minor triumph - in the company of the obsequious mavis bangs; diddy shovel the strongman; drowned herald prowse; cane-twirling beety; nutbeem, who steals foreign news from the radio; a demented cousin in the aunt refuses to give reporting; the much-zippered alvin yark; silent yaw; and old billy pretty, with his bag of secrets. by the time of the spring storms quoyle has learned how to gut cod, to escape from a pickle jar, and to tie a true lover's knot. by turns comical and dark, the shipping news is a celebration of the american genius for storytelling and of e. annie proulx's vigorous contribution to the art, and magic, of the contemporary novel access-restricted-item true addeddate 2020-12-09 05:33:31 boxid ia40010823 camera sony alpha-a6300 (control) collection .set printdisabled external-identifier urn:oclc:record:1245827564 foldoutcount 0 identifier shippingnews000prou\_m1g9 identifier-ark ark:/13960/t6p07qz6f invoice 1652 isbn 9780007268320 0007268327 ocr tesseract 4.1.1 ocr\_detected\_lang\_en ocr\_detected\_lang\_conf 1.0000 ocr\_detected\_script\_latin ocr\_module\_version 0.0.4 ocr\_parameters -l eng old\_pallet ia400070 openlibrary\_edition ol25217120m openlibrary\_work ol456089w page\_number\_confidence 94.09 pages 374 partner innodata pdf\_module\_version 0.0.4 ppi 300 rcs\_key 24143 republisher\_date 20201205184645 republisher\_operator associate-via-alonsabe@archive.org republisher\_time 453 scandate 20201204143821 scanner station18.cebu.archive.org scanningcenter cebu scribe3\_search\_catalog isbn scribe3\_search\_id 9781857022421 tts\_version 4.2-initial-97-g35291955 show more show less full catalog record marcxml plus-circle add review comment reviews there are no reviews yet. be the first one to write a review.
