In The Paradox of Choice, Barry Schwartz explains why too much of a good thing has proven detrimental to our psychological and emotional well-being. Synthesizing current research in the social sciences, he makes the counterintuitive case that eliminating choices can greatly reduce the stress, anxiety, and busyness of our lives. In accessible ...

The paradox of choice is an observation that having many options to choose from, rather than making people happy and ensuring they get what they want, can cause them stress and problematize decision-making. Barry Schwartz wrote about the negative consequences of having too many options in his 2004 book, The Paradox of Choice: Why More is Less ...

The more choice people have, the more freedom they have, and the more freedom they have, the more welfare they have. This, I think, is so deeply embedded in the water supply that it wouldn't occur to anyone to question it. And it's also deeply embedded in our lives. I'll give you some examples of what modern progress has made possible for us.

And that’s probably a dumb choice.” This brings us back to the Parenthood Paradox. A possible explanation for why the negative impact of having children on personal happiness is the highest in the United States might be its extreme focus on personal happiness (and hedonistic values). There I said it. The Parenthood Gap exists because of unrealistic expectations and desires regarding ...

The “paradox” consists in the fact that our best theory of rational choice seems to entail that it would be rational to pay any finite fee for a single opportunity to play the St. Petersburg game, even though it is almost certain that the player will win a very modest amount. The probability is $\frac{1}{2}$ that the player wins no more than \$2, and $\frac{3}{4}$ that he or she wins no ...
